

A Reinvention Convention: Revolutionizing Atopic Dermatitis Now Introduces 2 New Conferences: Revolutionizing Alopecia Areata and Revolutionizing Vitiligo

Lois Levine, MA

For those of you who are already familiar with the annual Revolutionizing Atopic Dermatitis (RAD) conference, get ready for even more compelling sessions this year: now, the RAD conference offers 2 new pillars in dermatologic education: Revolutionizing Alopecia Areata (RAA) and Revolutionizing Vitiligo (ReV).

At RAD, you will continue to learn about the most cutting-edge therapies, gain new insights, and enjoy exciting debates about the most important treatments in atopic dermatitis which will include: risk factors of AD, comorbidities associated with the condition, when to consider systemic therapies, the inside scoop on IL-13 in treating this disease, and others. At ReV, discover new immunological innovations; the latest studies on real-world experiences of patients with vitiligo; best treatments for vitiligo for skin of color; and much more. And at RAA, get caught up on the ongoing clinical trials for this disorder; the psychosocial impact of AA; treating AA in children; key factors in alopecia areata severity; and the most important breakthrough therapies for this hair loss disorder.

Join Jonathan I. Silverberg, MD, PhD, MPH, FAAD, conference chair of RAD; Brett King, MD, PhD, conference chair of Revolutionizing Alopecia Areata; and Nanette B. Silverberg, MD, conference chair of Revolutionizing Vitiligo, as well as hundreds of dermatology and allied health care professionals from all over the world for these new conferences, June 8-10, Chicago, Illinois. Don't miss out!
